

Slimline Hinged Doors

Adding an outstanding contemporary styling to any property, internal glass panel doors are the perfect way to create the illusion of extra space while allowing natural daylight to flow seamlessly throughout.

Whether it is for a sophisticated home or modern office environment, internal glass panel doors from Super Slim Glazing are an increasingly popular choice when looking to make a real design statement.

Internal glass panel doors add a touch of class when replacing more traditional timber doors, or as part of an internally glazed area. Choose smart or switchable glass to maintain privacy without losing light.

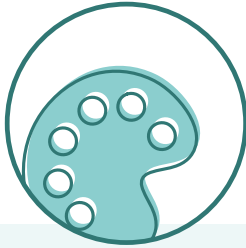

Combining superb functionality with outstanding design, all our internal glass panel doors are made-to-measure utilising our sleek Super Slim aluminium frame for enhanced sightlines and maximum glazed areas.

Made in the UK

All glazing BS6206 compliant
